

## ALERT Package

*This package is designed for a student that already has a license. It includes an evaluative on-road lesson and the Defensive Driving Skills program.*

### On-Road Driving Evaluation

This is an instructional/evaluative lesson that includes tips on improving driving skill. Instructor will provide feedback and recommendations to improve students skills based on the following 6 core objectives:

- Shuffle steering
- Pedal Control
- Lane Management
- Scanning
- Intersections
- Observation, planning, decision-making and judgment

### Defensive Driving Skills Program

#### Defensive Driving Skills Program (8.0 hours)

- **Defensive Driving Orientation**

*(2 hours - class is scheduled before Defensive Driving Simulation lessons)*

This class introduces the defensive driving principles the student will later experience on the simulator including hazard recognition, vehicle handling, space management, and speed management. For example, students will learn in the orientation what to do if they get a tire blow out; then the student will experience a tire blow-out in the simulation lessons.

- **Defensive Driving Skills Simulation Lab**

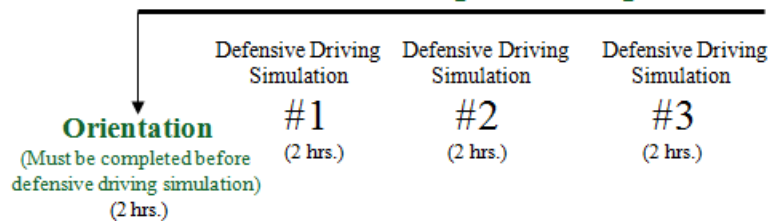

*(6 hours – 1:1 instruction scheduled in three 2-hour lessons on a fully interactive state of the art simulator. Scheduled after student is comfortable with basic skills, driving on the freeway, and driving at night)*

The program is designed to develop skills in hazard recognition, vehicle handling, space and speed management and further develop observation, planning and decision making skills. This is done through 40 different scenarios allowing students to experience a multitude of risky situations and the ability to learn from their mistakes. Students are assessed before they begin the program utilizing a profiler assessment to determine areas of weakness and again at the end of the program to measure improvement.

- **Parent Class**

*(3 hours – ideally scheduled early on in the program)*

Designed for the parents or guardian of the student to assist them in the practice phase of the driver training process. The class includes information regarding teenage driving and instruction from a DrivingMBA instructor who goes over the step-by-step what to do when practicing with your student.

- **Car Maintenance Class (Optional)**

*(1.5 hours – class is held at a maintenance shop either at Community Tire or Tire Pros. The class is held once a month and a student can schedule it at any time)*

Designed to cover tire maintenance, engine fluids, using jumper cables, signs of engine distress and much more. Students also learn the responsibility of maintaining their vehicle.

**Car  
Maintenance Class**  
(1.5 hrs.)

**Simulation and On-Road Scheduling Hours**

Monday - Friday	Saturday
12:00 – 2:00 pm	9:00 – 11:00 am
3:00 – 5:00 pm	11:00 am – 1:00 pm
